ABOUT

Senior Computer Science student at Texas A&M University with a proven track record in full-stack development and real estate finance technology. Experienced in delivering robust business-critical data reporting software. Seeking opportunities to apply agile methodologies and system integration skills to drive real world solutions.

EDUCATION

Texas A&M University August 2022 – May 2026
Bachelor of Science - Computer Science, GPA: 3.9/4.0 College Station, TX

- Minor in Business
- Relevant Coursework: Machine Learning, Applied Cryptography, Design and Analysis of Algorithms, Foundations of Software Engineering, Artificial Intelligence, Parallel Computing, Scientific Computing
- Current Enrollment: Cloud Computing

EXPERIENCE

Hines Interests LP 2022 – 2024 (June – August)
Software Development Intern Houston, TX

- June 2024 – August 2024
 - Led the development of an interactive MapBox GL JS map for global property reporting.
 - Improved efficiency of web app hosting through solutions like integrating the new cloud provider's unstructured data storage and access, reducing file load times by 20%.
 - Mitigated critical issues related to the transition of cloud storage systems, resulting in a 30% increase in deployment efficiency.
 - Completed training in commercial real estate finance through Hines Analyst Boot Camp Week and Eastdil Secured Virtual Real Estate Finance Training Program, building foundational knowledge to support investment cycle reporting solutions.
- June 2023 – August 2023
 - Helped design and develop front-end modernization of legacy expense reporting software from Django templating to Next.js, boosting user satisfaction within the accounting department.
 - Collaborated with clients and stakeholders in regular and impromptu meetings involving product updates and planning, accelerating cross-client development.
- June 2022 – August 2022
 - Worked on development sprints for Django-based software assisting the global investment pipeline.
 - Created new documentation for Ubuntu-based development environment to work with Windows.

SKILLS AND ABILITIES

Website Application Development: Django, Next.js, React, Tailwind, Node.js, jQuery, FastAPI, HTML, CSS

General Programming: Python, C/C++, Java, SQL

AI/ML, Data Science: PyTorch, Numpy, Hugging Face Transformers, MapBox GL JS, Pandas

Other: Agile Methodologies, Git, Business Analysis, Real Estate Finance, Microsoft Excel

PROFESSIONAL DEVELOPMENT

- Docker Foundations Professional Certificate | July 2025
- The Real Estate Development Modeling Master Class | May 2025
- The Real Estate Financial Modeling Bootcamp | Jan 2025
- Eastdil Secured Virtual Real Estate Finance Training Program | June 2024

ACTIVITIES

Sketch Recognition Lab

September 2025 – November 2025

Undergraduate Researcher

College Station, TX

- Implemented 3D visualization of stylus tracking and drawing using OpenGL. Researching uses of stereoscopic vision within commercial environments.
- Currently researching improvements to the particle swarm optimization algorithm and exploring physics-informed neural networks used to correct tracking data for magnet-based stylus in mid-air.

CRHS Innovation and Development Association

September 2019 – May 2022

President (2021 – 2022), VP of Education (2020 – 2021)

Katy, TX

- High school club for computer science and attendance of hackathons.
 - Won 3 hackathons out of 14 total.
- Organized club meetings for hackathons and education.
- Assisted teacher outreach with VP of Communications.
- Organized HACK Initiative branch, a junior high school coding club for Cinco Ranch and Beck JH

PROJECTS

- **Stackbox** – Ongoing project to study whether automated generation of a stacking plan from an three-dimensional digital file is possible. Used Numpy and MapBox GL JS.
- **LLM Sandbox** – Testing environment for the feasibility of small, local large language models. Used Hugging Face Transformers, Next.js, and FastAPI.
- **“Panda Express” Point of Service System** – Foundations of Software Engineering class project. An integrated point-of-sale system web app with OpenAI powered voice ordering intended for Panda Express. Used Google OAuth 2.0, React, and Node.js.
